CODING }

Function codes:

A Administrative or Office

V Vaulted storage

W Warehouse storage

P Production/equipment area

~~O Office~~

E Building equipment (heating, A/C, electrical, etc.)

Purpose: General information access to P+PD report

Support yearly GRAMS report

Support Building Planning Staff inquiries

Provide official base for P+PD renovations

Room number 159

Floor 1

~~Dimensions~~

Designation P.D.C./P.D. OFFICE

Assigned to P.D.C./P.D.

Dimensions (LxW) 14.5 x 11.5

Square footage 166.75

Work stations 1

Number of personnel 1

Use of room ~~Classroom = CC~~ Production = PRO

(MULTIPLE USES Computer Room = CR Microfilm = MF

FOR SAME ROOM.) Conference Room = CF Motion Picture = MP

Copy Room = CP Laboratory = LAB

~~File Room = FR~~ Office = OF~~Library = LIB~~

Machine Room = MR

~~Registry = REG~~

Storage = ST

Toilet Room = TR

Under Construction = UC

None of the Above = NA

P+PD SPACE REQUIREMENTS, FY 82-87:

Expand P+P building physical space by

- a) adding office space to roof level, allowing present office space to be converted to production and equipment needs, or
- b) adding additional space to both levels of the building by adding on to the northeast corner, or
- c) adding expansion space by excavating the lower level portion of the building which is currently below the bindery and press areas, and adjacent to Room A5 on the lower level.

Expand P+P building warehouse and storage space by

- a) excavating lower level under current bindery, press, and supply areas. This concept could possibly be designed to allow loading dock facilities within the physical limits of the building itself
- b) excavating the lower level would offer a considerable area for expansion of the many functions now performed in the Photography Branch

Provide expansion space for growing COM requirements in AT-4004 Headquarters. Possible space alternative is current Self-Study location.

Provide expansion space for growing audio-visual requirements. Possibilities include moving employee snack bar to new roof level module, or expansion of both levels of the northeast corner of the building.
